## **DETAILED ACTION**

### ***Election/Restrictions***

1. The restriction requirement, mailed September 12, 2003, is withdrawn by the examiner in view of Applicants' remarks filed December 30, 2003.

### ***Priority***

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 22, 23, 27 and 28 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The term "prodrugs" is not defined in the specification and/or the claims. There are not guidelines as to one skilled in the art would make and/or use said "prodrugs". Further, is not clear to one skilled in the art what are the modifications, that is, structural changes to the "drugs" that lead to the formation of the "prodrugs". Furthermore, is also unclear what are the drugs that are modified. Thus, one skilled in the art presented with the lack of information about the "prodrugs" would not be able to make and/or use said "prodrugs" without undue experimentation.

Art Unit: 1621

*Allowable Subject Matter*

5. Claims 1-21, 24-26 and 29-34 are allowed over the prior art of record. The prior art does not teaches or discloses the use of the compounds of the formula I in inhibiting or treating heart damage induced by a cardiotoxic medicament.
